AEDC June 2011 Employment Report

Executive Summary

The unemployment rate in Anchorage is down 1.0 percentage points in June 2011 from its recent high of 7.7 percent in February 2010, settling at 6.7 percent. Overall unemployment is averaging 6.4 percent in Anchorage for the first 2 quarters of 2011, which is 0.3 percent below 2009 and almost a full percentage point below the 2010 year-to-date average. Monthly labor force growth in Anchorage has continued to track above 2010 levels and is currently averaging 1,019 more workers in 2011, compared to 2010. Job growth continues to outpace labor force growth, which really means that the Anchorage economy is growing in the face of continued national uncertainly.

Services producing jobs in (engineering, Anchorage retail, tourism, healthcare, etc.) are up 2011 over 2010 by 1,250 jobs, or 0.91 percent. The sectors seeing the most growth are professional & business services (up 365, 1.92 percent), and education and health services (up 950 jobs, 4.42 percent, with 750 of those in the healthcare sector). It is also important to note that the seasonal nature of the services industries (tourism and retail) results in an employment spike in the summertime.

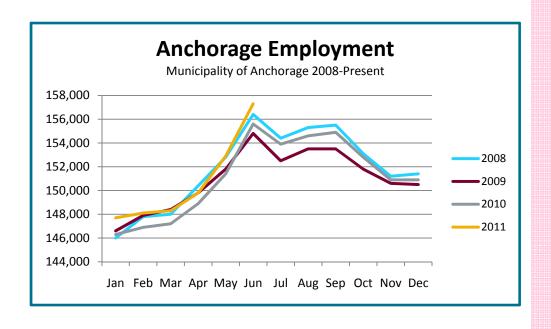

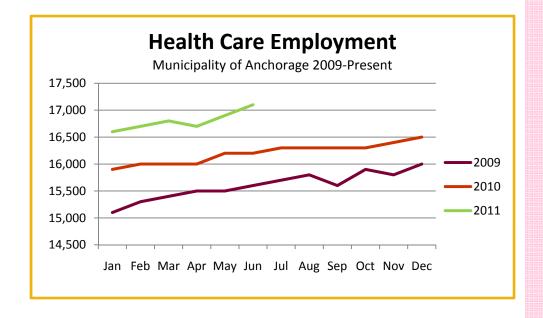

decrease in Anchorage's unemployment rate in the face of a growing labor force.

Goods producing jobs which are construction work, mining, and oil & gas production are up a modest 33 jobs, or 0.27 percent. Manufacturing, interestingly enough, is showing some signs of growth

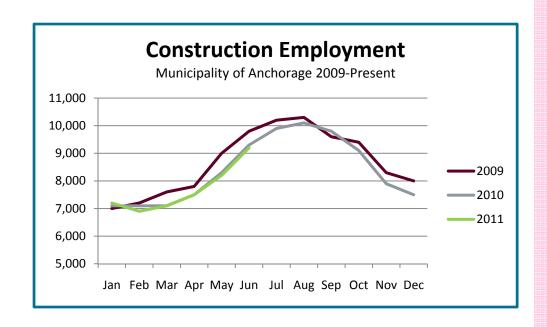

The slow job growth in the goods producing sector is being offset by significant employment increases in the service sector. Job growth in the professional services and health care industries has fueled the sustained

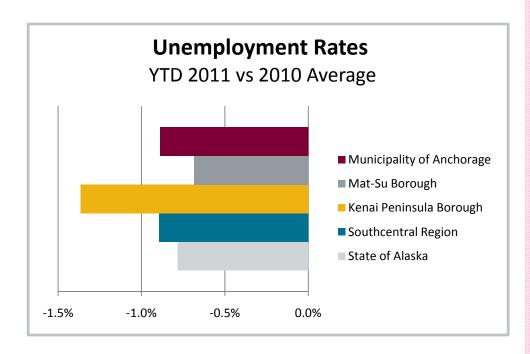

Preliminary numbers for Anchorage's employment show an average increase of 1,300 jobs for 2011 vs. 2010, with a month-to-month (June 11 vs. June 10) comparison showing an increase of 1,700 jobs or 1.12 percent. Employment numbers are still showing overall growth over the highs of 2008.

In January Anchorage was averaging 16,600 Health Care jobs, in June Anchorage averaged 17,100 jobs.
Compared to 2010 levels this is a growth of about 750 jobs, or about 4.6 percent growth. This continues to be a hot sector for growth. Recent employment figures and long-term projections lead us to believe that the growth will be sustained.

Construction is a naturally cyclical industry. On average year-to-date this sector is down only 50 jobs. May to June showed an average increase of 1,000 jobs which puts 2011 construction employment on track with 2010 levels.

Furthermore, permit application values for larger projects are picking up. We are expecting overall growth over 2010 numbers in this sector.

Year-to-date 2011 vs. 2010 average unemployment rates are down for the state overall 0.8 percent. Southcentral saw a 0.9 percent decrease in their YTD average unemployment rates, with Anchorage seeing a decrease of almost a full percentage point (0.9%).

This is great news for Anchorage, where the labor force has grown by an average of 1,019 workers YTD.

⁻ Government includes employees of public school systems and the University of Alaska.

⁻ Beginning January 2001, wage and salary employment estimates were published under a new classification system. The Standard Industrial Classification system (SIC) has been replaced by the North American Industry Classification System (NAICS). Data prior to 2001 are comparable only at the Total Nonfarm and Government levels.

^{1/} As of January 2001, certain federally-recognized tribal entities were moved to Local Government, which created a series break for Total Government and Local Government. Please see the April 2002 Alaska Economic Trends publication for a detailed explanation.

^{2/} This category was called "Natural Resources and Mining" in previous years. The change is in name only; the industries it includes remain the same.

Not seasonally adjusted

⁵Includes public schools, the University of Alaska, and federally recognized tribal entities

Unemploym	Unemployment Rates, Seasonally Adjusted											
	6/11	5/11	6/10									
Alaska	7.5%	7.3%	7.9%									
U.S.	9.2%	9.1%	9.5%									

Sources for graph and tables: Alaska Department of Labor and Workforce Development, Research and Analysis Section; and U.S. Bureau of Labor Statistics

Alaska's seasonally adjusted unemployment rate for June was 7.5 percent, a statistically insignificant increase from May's rate of 7.3, which was revised down from 7.4 percent. The comparable nationwide rate in June was 9.2 percent, slightly up from May's rate of 9.1 percent.

In Alaska and nationwide, unemployment rates remain below 2010 levels. The national jobless rate has trended slowly upward since April, and June marked the 31st month in a row in which Alaska's unemployment rate was lower than the nation's.

In May, the most recent month for which individual state data are available, 31 states and Washington, D.C., had unemployment rates higher than Alaska's; 16 states had lower rates; and two reported the same rate. Nevada again had the highest jobless rate at 12.1 percent, and North Dakota remained the lowest at 3.2 percent. Only 24 states reported decreases in their unemployment rates in May, down from the 39 states whose rates decreased in April.

Around Alaska, the not seasonally adjusted unemployment rates ranged from 2.0 percent in Bristol Bay to 23.5 percent in Wade Hampton Census Area. Skagway's rate was 3.1 percent, representing the group of boroughs and census areas whose seasonal fishing and tourism employment prompts a sharp drop in joblessness each summer. Some other areas of the state, such as Wade Hampton, experience chronically high unemployment due to a persistent lack of available jobs.

Beginning with the production of preliminary estimates for March 2011, production of state and metropolitan area Current Employment Statistics estimates has transitioned from the Department of Labor and Workforce Development's Research and Analysis Section to the U.S. Bureau of Labor Statistics. Concurrent with this transition, the BLS implemented several changes to the methods to help standardize estimation across states. While these changes reduce the potential for statistical bias in state and metropolitan area estimates, they may increase month-to-month variability. More detailed information on the CES changes is available on the BLS Web site at http://www.bls.gov/sae/cesprocs.htm.

²Based on the margin of error of the estimate, a 90 percent confidence interval statistically determines a range of values within which the "true" value falls with a 90 percent level of confidence. For more information, go to http://labor.alaska.gov/research/c-i.pdf.

³Excludes the self-employed, fishermen and other agricultural workers, and private household workers ⁴Private education only

P = Preliminary. As more information becomes available, data are revised every month for the previous month and again at the end of every calendar year.

Note: The official definition of unemployment excludes anyone who has not made an active attempt to find work in the four-week period up to and including the week that includes the 12th of the reference month. Many in rural Alaska do not meet the definition because they have not conducted an active job search due to the scarcity of employment opportunities.

¹Unemployment rates that are not seasonally adjusted should not be compared with those that are.

²Because of the creation of new boroughs, this borough or census area has been changed or no longer exists. Data for the Skagway Municipality and Hoonah-Angoon Census Area (previously the Skagway-Hoonah-Angoon Census Area) became available in 2010. Data for the City and Borough of Wrangell, Petersburg Census Area, and Prince of Wales-Hyder went into effect in January 2011. Prior to January 2011, data were published for Wrangell-Petersburg Census Area and Prince of Wales-Outer Ketchikan Census Area.
