1.92% 2,900 Increase of Jobs for Nov.'ll vs. Nov'l0

1,743 Average more workers (YTD) in 2011 than 2010

Total Jobs = Goods + Services

More Services Producing Jobs (YTD) in 2011 than 2010

0%

Goods Producing Jobs
(YTD) in 2011 than 2010

Executive Summary

The unemployment rate in Anchorage continues to trail the national level by about 3 percentage points and for November unemployment is at 5.5% which is its 4th consecutive month below 6%. Overall unemployment is averaging 6.1 percent in Anchorage for the first 10 months of 2011, which is 0.8 percent below the same period for 2010. Monthly labor force growth in Anchorage has continued to track above 2010 levels and is currently averaging 1,743 more workers in 2011, compared to 2010. Job growth continues to outpace labor force growth, which really means that the Anchorage economy is continuing to grow.

Services Producing Jobs

Services producing jobs in Anchorage (engineering, retail, tourism, healthcare, etc.) are up 2011 over 2010 by 1,618 jobs, or 1.17 percent. The sectors seeing the most growth are professional & business services (up 318, 1.73 percent), and educational and health services (up 991 jobs, 4.58 percent, with 773 of those in the healthcare sector).

Overall, unemployment is averaging
6.1% in Anchorage for the first
11 months of 2011, which is 0.8% below
2010 for the same time.

5.19%

IOO More Manufacturing Jobs (YTD) in 2011 than 2010

Goods Producing Jobs

Goods producing jobs which are construction work, mining, and oil & gas production are flat with 2010. Manufacturing, interestingly enough, continues to show signs of growth (up 100 jobs, 5.19 percent). Even with the growth in Manufacturing this segment is still trailing the highs of 2008. The slow job growth in the goods producing sector is being offset by significant employment increases in the service sector. Job growth in the professional services and health care industries has fueled the sustained decrease in Anchorage's unemployment rate in the face of a growing labor force.

Anchorage Employment

Preliminary numbers for Anchorage's employment show an average increase of 1,627 jobs for 2011 vs. 2010, with a month-to-month (Nov'll vs. Nov'l0) comparison showing an increase of 2,900 jobs or 1.92 percent. Employment numbers are still showing overall growth over the highs of 2008.

Health Care Jobs in Nov. 2011

Health Care Employment

In January Anchorage was averaging 16,600 Health Care jobs, in November Anchorage averaged 17,100 jobs. Compared to 2010 levels this is a growth of about 773 jobs, or about 4.78 percent. This continues to be a hot sector for growth. Recent employment figures and long-term projections lead us to believe that the growth will be sustained.

1.73%

3 1 8 Professional & Business Services Jobs (YTD) in 2011 vs. 2010

Professional & Business Services

Professional and Business Services are part of the services side of the jobs equation.

(Total jobs= Goods + Services) AEDC expected this sector to grow by about 100 jobs in 2011. So far this year this indicator is up on average 318 jobs or 1.73 percent.

Don't start counting chickens yet; consider this a trailing rather than leading indicator of overall health. These jobs are mostly dependent on Gov't and Oil & Gas spending. While this sector is currently very healthy we could see changes due to Gov't spending cuts.

Transportation Employment

AEDC predicted a 300 job increase in transportation jobs for 2011. The year started out a little behind 2010 (10,000 vs 10,200) jobs but then in about May it turned around and the industry started to see growth. Currently this sector is averaging 11,000 jobs that's up 200 jobs from 2010 or 1.85 percent. Keeping it above the recent highs of 2009.

⁻ Government includes employees of public school systems and the University of Alaska.

⁻ Beginning January 2001, wage and salary employment estimates were published under a new classification system. The Standard Industrial Classification system (SIC) has been replaced by the North American Industry Classification System (NAICS). Data prior to 2001 are comparable only at the Total Nonfarm and Government levels.

^{1/} As of January 2001, certain federally-recognized tribal entities were moved to Local Government, which created a series break for Total Government and Local Government. Please see the April 2002 Alaska Economic Trends publication for a detailed explanation.

^{2/} This category was called "Natural Resources and Mining" in previous years. The change is in name only; the industries it includes remain the same.

⁻ Government includes employees of public school systems and the University of Alaska.

⁻ Beginning January 2001, wage and salary employment estimates were published under a new classification system. The Standard Industrial Classification system (SIC) has been replaced by the North American Industry Classification System (NAICS). Data prior to 2001 are comparable only at the Total Nonfarm and Government levels.

^{1/} As of January 2001, certain federally-recognized tribal entities were moved to Local Government, which created a series break for Total Government and Local Government. Please see the April 2002 Alaska Economic Trends publication for a detailed explanation.

^{2/} This category was called "Natural Resources and Mining" in previous years. The change is in name only; the industries it includes remain the same.

Unemployn	nent Rate	s, Seasor	ally Adjusted	
	11/11	10/11	11/10	
Alaska	7.3%	7.4%	7.9%	
U.S.	8.6%	9.0%	9.8%	

Alaska's seasonally adjusted unemployment rate was essentially unchanged in November, declining one-tenth of a percentage point to 7.3 percent.

The comparable national rate for November was 8.6 percent, down from 9.0 percent in October. The big drop in the national rate was only the second time in the past 10 years that it has fallen by as much as four-tenths of a percentage point.

The U.S. and Alaska rates have both drifted downward over the past year. Alaska's unemployment rate is down six-tenths of a percentage point from November 2010 and the national rate is down 1.2 percentage points.

Not seasonally adjusted unemployment rates increased in all but one of the state's regions in November, which is typical as fisheries slow and tourism enters a deep freeze. The biggest increases in unemployment were in the most fishing-dependent regions — the Gulf Coast and Southwest rates increased by more than a percentage point, and rates nearly doubled in Kodiak and the Aleutians.

Unemployment was 20 percent or higher in Skagway and the Denali Borough, the two areas that depend most on tourism.

Preliminary employment estimates show marginal growth since November 2010, although the estimates are subject to potentially large revisions. Overall, it appears that 2011 will be a year of mild job growth for Alaska.

Beginning with the production of preliminary estimates for March 2011, production of employment estimates has transitioned from the Department of Labor and Workforce Development's Research and Analysis Section to the U.S. Bureau of Labor Statistics. Concurrent with this transition, BLS implemented several changes to the methods to help standardize estimation across states. While these changes reduce the potential for statistical bias in state and metropolitan area estimates, they may increase month-to-month variability. More detailed information on the changes is available on the BLS Web site at http://www.bls.gov/sae/cesprocs.htm.

Contact: Neal Fried, Economist (907) 269-4861 Research and Analysis Web site: http://laborstats.alaska.gov

²Based on the margin of error of the estimate, a 90 percent confidence interval statistically determines a range of values within which the "true" value falls with a 90 percent level of confidence.

For more information, go to http://labor.alaska.gov/research/c-i.pdf.

³Excludes the self-employed, fishermen and other agricultural workers, and private household workers. Only select categories are included, so sector values will not sum to the total employment. ⁴Private education only.

P = Preliminary. As more information becomes available, data are revised every month for the previous month and again at the end of every calendar year.

Note: The official definition of unemployment excludes anyone who has not made an active attempt to find work in the four-week period up to and including the week that includes the 12th of the reference month. Many in rural Alaska do not meet the definition because they have not conducted an active job search due to the scarcity of employment opportunities.

Source: Alaska Department of Labor and Workforce Development, Research and Analysis Section; and U.S. Bureau of Labor Statistics

¹Unemployment rates that are not seasonally adjusted should not be compared with those that are.

²Because of the creation of new boroughs, this borough or census area has been changed or no longer exists. Data for the Skagway Municipality and Hoonah-Angoon Census Area (previously the Skagway-Hoonah-Angoon Census Area) became available in 2010. Data for the City and Borough of Wrangell, Petersburg Census Area, and Prince of Wales-Hyder went into effect in January 2011. Prior to January 2011, data were published for Wrangell-Petersburg Census Area and Prince of Wales-Outer Ketchikan Census Area.
