

July 2013 Employment Report

4.9%
July Unemployment Rate for Anchorage

MONTHLY UNEMPLOYMENT

The unemployment rate for Anchorage in July was **4.9 percent**, down 0.4 percent from June. June's unemployment rate was revised down 0.1 percent from 5.4 to 5.3. This month to month decrease is typical for July, and in the last ten years, this change has ranged from -0.4 to -0.8 percent. July is usually the beginning of a downward trend in the unemployment rate each year and is a good indicator of where the annual rate will be.

In the last two decades, the July rate has been within 0.3 percent of the year's annual rate. As always, it should be noted that these are preliminary survey figures for July and will be revised next month and will see further revisions in early 2014 upon more detailed analysis.

YEAR-TO-DATE UNEMPLOYMENT

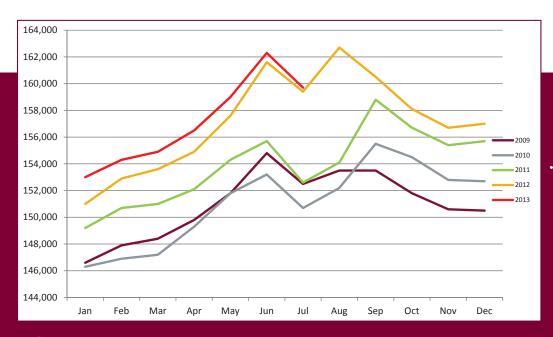

The average year-to-date (YTD) **non-seasonally adjusted unemployment rate in Anchorage was 5.0 percent**, percent, down 0.1 from June and 0.8 percent lower than the 2012 YTD average. An increase of 307 in the employment total and a decrease of 898 in the Anchorage labor force during the YTD period has **resulted in a reduction of 1,243 people** in the reported unemployment total. The total **number of unemployed people in Anchorage is estimated at 7,692** (those actively looking for jobs), more than 1,000 less than July 2012. In the Mat-Su and Kenai Peninsula Boroughs, the monthly unemployment rate has decreased 15 and 14 percent, respectively, from 2012 YTD (see the charts at the end of this report for more details).

It is important to note that these Anchorage unemployment numbers represent the labor force residing in Anchorage, and do not include jobs in Anchorage held by residents from outside the municipality. The industry employment estimates referenced in the remainder of this report are representative of all jobs in the Municipality of Anchorage, regardless of the job holder's place of residency.

ANCHORAGE INDUSTRY EMPLOYMENT ESTIMATES

As for Anchorage industry employment estimates, the YTD average is continuing to show improvement over 2012 with a total net increase of 1,243 jobs so far. The private sector (total jobs minus government jobs) has grown by more than 2,000 jobs during this time, equaling a rate of 1.6 percent. Government employment has declined by 800 jobs so far, with losses evenly split between federal and local education sectors.

Industries showing the largest YTD growth rates are mainly in the goods producing category, which includes oil & gas, manufacturing and construction. Of service providing industries, Educational & Health Services is leading the way with a 3.14 percent YTD growth rate. Five of the ten major sector's July 2013 averages are at or above June, indicating that the rate of job growth is leveling off.

EXECUTIVE SUMMARY CONT.

MONTHLY REVISIONS

Each month, the Alaska Department of Labor's Research and Analysis Division revises the previous month employment numbers based on the availability of newer or late arriving data. The following tables show the changes in Anchorage's and Alaska's June job totals by industry. Most adjustments are relatively minor, however, some changes do occur which are significant. Changes such as these are normally the result of rounding errors, job classification modifications, sample size or modeling issues, or errors within the industry.

SERVICES PRODUCING JOBS

ENGINEERING, RETAIL, TOURISM, HEALTH CARE, ETC.

Services producing jobs in Anchorage totaled 143,200 for July. Overall, the YTD average is up 400 jobs from 2012 YTD.

The educational and health services sector's growth rate is 3.14 percent so far this year, making it the highest growth sector in the service industry. Jobs in the leisure and hospitality sector are growing at twice the rate of the overall totals at 1.79 percent. Both accommodation and food service sectors are seeing growth, indicating a positive trend in the tourism industry. Federal and local government sectors are both averaging less than this point last year (both 443 less jobs), but the state government jobs average is up 57 jobs YTD from 2012.

GOODS PRODUCING JOBS

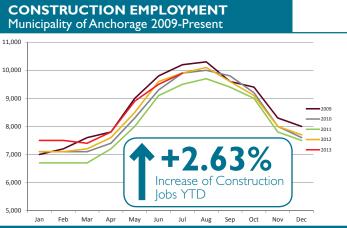

CONSTRUCTION WORK, MINING, OIL & GAS PRODUCTION, MANUFACTURING

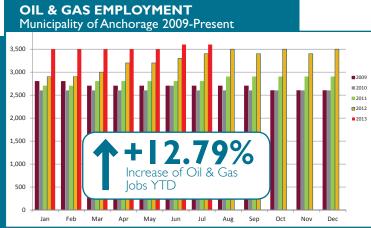

Goods producing jobs (those jobs that are specifically tied to production, not those which support the production or maintenance of the production jobs) are maintaining the growth seen all year, averaging **814 more jobs in 2013 YTD** over the same period in **2012**.

The oil & gas sector is leading the way with 400 more jobs than last year at this point; a growth rate of nearly 13 percent. Positive signs in the industry include Hilcorp's reactivation of the Baker platform in Cook Inlet to produce oil, the positive initial results for Bucanneer at the Cosmopolitan prospect offshore near Anchor Point, and BP's development plans for the Sag River area at Prudhoe Bay.

The construction industry is also seeing higher job numbers in July, averaging 214 more jobs over 2012 YTD. Municipal building permit valuations remain very high and are up more than 40 percent YTD from last year, indicating that the strong start to the construction season continued through the summer. New permits applied for in July include renovations at Service High School (\$2.1 million) and further development of the municipality's John M. Asplund Wastewater Treatment Facility (\$9.1 million).

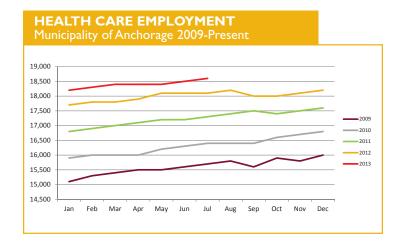

• • • • • • • • • SERVICES PRODUCING JOBS SUMMARY

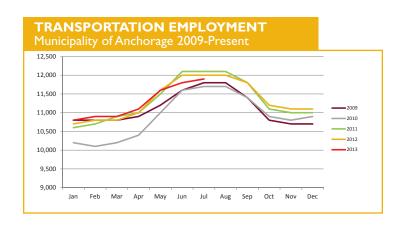

HFAITH CARF FMPI OYMFNT

The health care industry is still going strong, with **471 MORE JOBS** over 2012 YTD. The 2.63 percent YTD job growth in the local health care sector is below the 2012 end of year rate, but is still one of the fastest growing service producing industries. If this trend continues through 2013, the sector will beat AEDC's January projection of 400 additional health care jobs. Health care has been identified by the state Department of Labor as the industry with the highest growth potential in Alaska for the next decade.

TRANSPORTATION

July's estimate of 11,900 jobs is slightly below 2012 by 100, but the YTD average is nearly unchanged with 14 more jobs. Decreasing amounts of cargo transiting through the Ted Stevens Anchorage International Airport and the Alaska Railroad have stunted job growth for most of the year and this sector will be hard pressed to reach AEDC's January estimate of an additional 100 jobs by the end of the year.

PROFESSIONAL & BUSINESS SERVICES

business services are expected.

ENGINEERING, ARCHITECTURE, LEGAL SERVICES, ACCOUNTING, SCIENTIFIC RESEARCH, WASTE MANAGEMENT & ADMINISTRATIVE SERVICES

The YTD average is up 414 jobs from 2012

and the rate of increase is one of the largest of all service providing industries at 2.1 percent. Job growth within this industry is often tied to growth in other industries such as oil & gas, construction and transportation. As these goods producing industries continue to grow, more positions in professional and

• • • • • • • • • • • • • • • • UNEMPLOYMENT CLAIMS

Initial unemployment claim applications can be interpreted as a proxy for layoffs. They tend to fall as job growth accelerates.

Continuing claims figures helps to show how well unemployed workers are re-entering the workforce. This total does not include workers receiving extended benefits from the federal government. The third quarter numbers are still tracking below the previous four years, ending July with 10,479 claimants. Initial claims are continue to trend down and ended the month at 1,616 and are likely to stay close to this level for the next four to five weeks before the annual upward movement in early September.

All data referenced in this employment report is from the State of Alaska, Dept. of Labor & Workforce Development website: www.laborstats.alaska.gov

All totals are non-seasonally adjusted totals.

⁻ Government includes employees of public school systems and the University of Alaska.

⁻ Beginning January 2001, wage and salary employment estimates were published under a new classification system. The Standard Industrial Classification system (SIC) has been replaced by the North American Industry Classification System (NAICS). Data prior to 2001 are comparable only at the Total Nonfarm and Government levels.

^{1/} As of January 2001, certain federally-recognized tribal entities were moved to Local Government, which created a series break for Total Government and Local Government. Please see the April 2002 Alaska Economic Trends publication for a detailed explanation.

^{2/} This category was called "Natural Resources and Mining" in previous years. The change is in name only; the industries it includes remain the same.

⁻ Totals may not equal sub-sections due to rounding.

Unemployment rate at 6.3 percent in July

Alaska's seasonally adjusted unemployment rate was 6.3 percent in July, up three-tenths of a percentage point from June's revised rate. The comparable national rate was 7.4 percent.

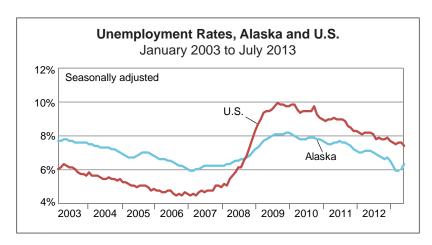

Alaska's not-seasonally adjusted rate was 5.9 percent in July, down six-tenths of a percentage point from June. Large declines in the unadjusted rate are typical from June to July. The unadjusted rate was also seven-tenths of a percentage point lower than it was one year ago.

Not-seasonally adjusted rates fell in 26 of 29 boroughs and census areas. Summer employment was firing on all cylinders in July, reflected in low unemployment across the state.

The lowest rates were in Bristol Bay Borough at 1.1 percent and the Municipality of Skagway at 2.3 percent. Bristol Bay and Skagway both have small year-round populations and depend heavily on a single summer industry. In Bristol Bay it's salmon fishing, and in Skagway it's tourism.

The largest over-the-month rate drops were in Aleutians East Borough and Aleutians West Census Area, where rates fell 4 and 2.3 percentage points, respectively. The summer pollock and salmon fisheries are in full swing in the Aleutians by July, which explains the drop in unemployment.

P = Preliminary. As more information becomes available, data are revised every month for the previous month and again at the end of every calendar year.

Note: The official definition of unemployment excludes anyone who has not made an active attempt to find work in the four-week period up to and including the week that includes the 12th of the reference month. Many in rural Alaska do not meet the definition because they have not conducted an active job search due to the scarcity of employment opportunities.
