March 2013 Employment Report Anchorage

4.9%

March Unemployment Rate
for Anchorage

anchorage
big wild life™

EXECUTIVE SUMMARY

MONTHLY UNEMPLOYMENT

The unemployment rate for Anchorage in March was **4.9 PERCENT**, a 0.2 decrease from February. This is the lowest March unemployment rate in Anchorage since 1999 (4.8) and the second lowest March reading since 1990. March is typically the month where the unemployment rate begins to decrease through May, and over the last ten years, this decline has averaged over 0.4 percent. If 2013 follows this trend, Anchorage may see unemployment dip into the 4 to 4.5 percent range for a number of months this year.

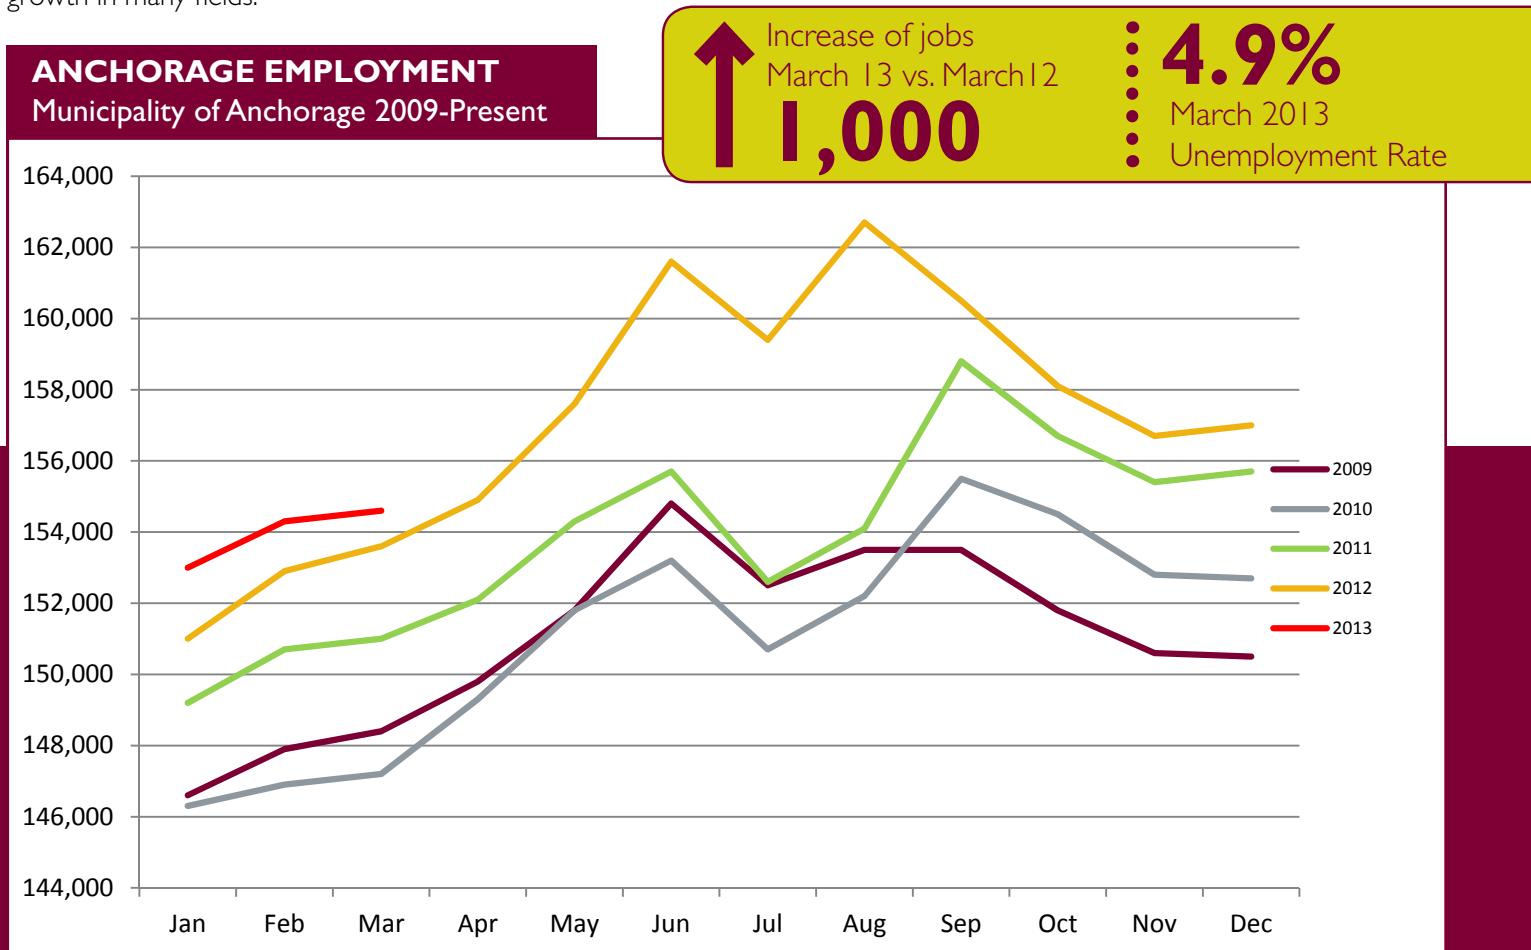

YEAR-TO-DATE UNEMPLOYMENT

The average year-to-date (YTD) **non-seasonally adjusted unemployment rate in Anchorage was 5.2 percent**, down from 5.4 percent in February and 0.8 percent lower than the 2012 YTD average. An increase of 462 to the employment total and a decrease of 768 from the Anchorage labor force during the YTD period has resulted in a reduction of 1,230 people in the reported unemployment total.

It is important to note that these unemployment numbers represent the labor force residing in Anchorage, and do not include jobs in Anchorage held by residents from outside the municipality. The industry employment estimates referenced in the remainder of this report are representative of all jobs in the Municipality of Anchorage, regardless of the job holder's place of residency.

ANCHORAGE INDUSTRY EMPLOYMENT ESTIMATES

As for the Anchorage Industry Employment estimates, the YTD average is growing strongly over 2012 with a **TOTAL INCREASE OF 1,467 JOBS SO FAR**. Industries showing the largest YTD growth rates include oil & gas, manufacturing and construction. Seven of the ten major sector's March 2013 averages are at or above March 2012, indicating sustained growth in many fields.

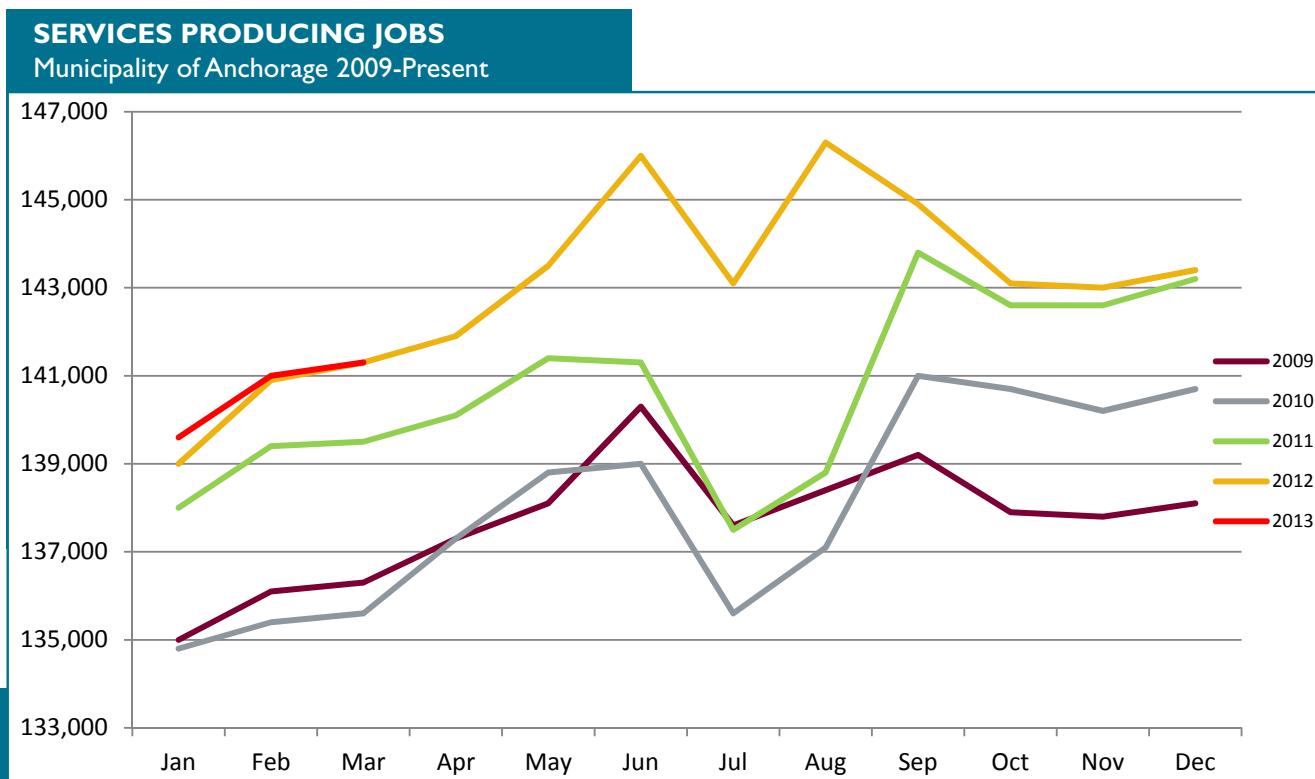

SERVICES PRODUCING JOBS

ENGINEERING, RETAIL, TOURISM, HEALTH CARE, ETC.

Services producing jobs in Anchorage totaled **141,300** for March. Overall, the YTD average is **up 233 jobs** from 2012 YTD.

The **educational and health services sector growth rate is 2.46 percent** so far this year, making it the highest growth sector in the service industry. **Federal and local government sectors are both averaging less than this point last year** (-467 for federal and -500 locally), but the **state government jobs average is up 100 YTD**. Tourism related job growth is expected to be strong this year as indicators in the visitor industry are generally positive.

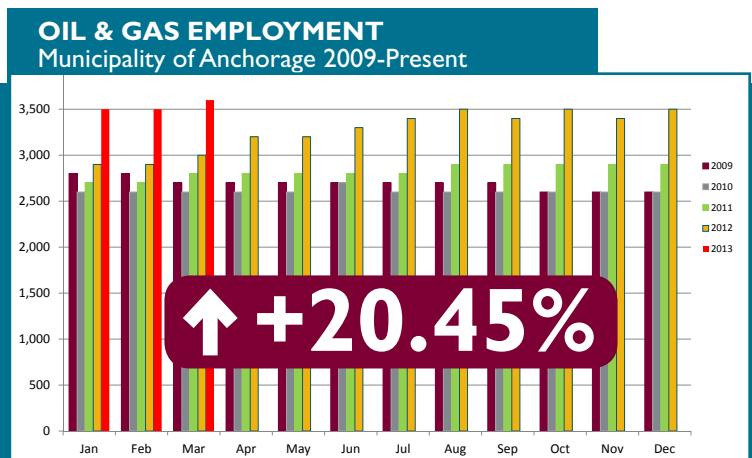

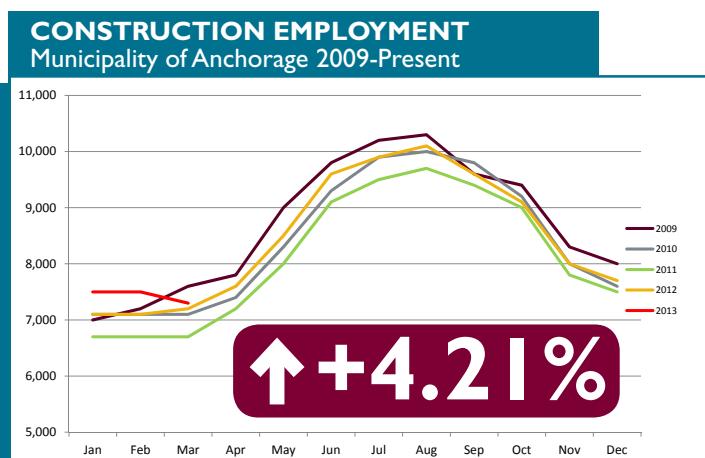

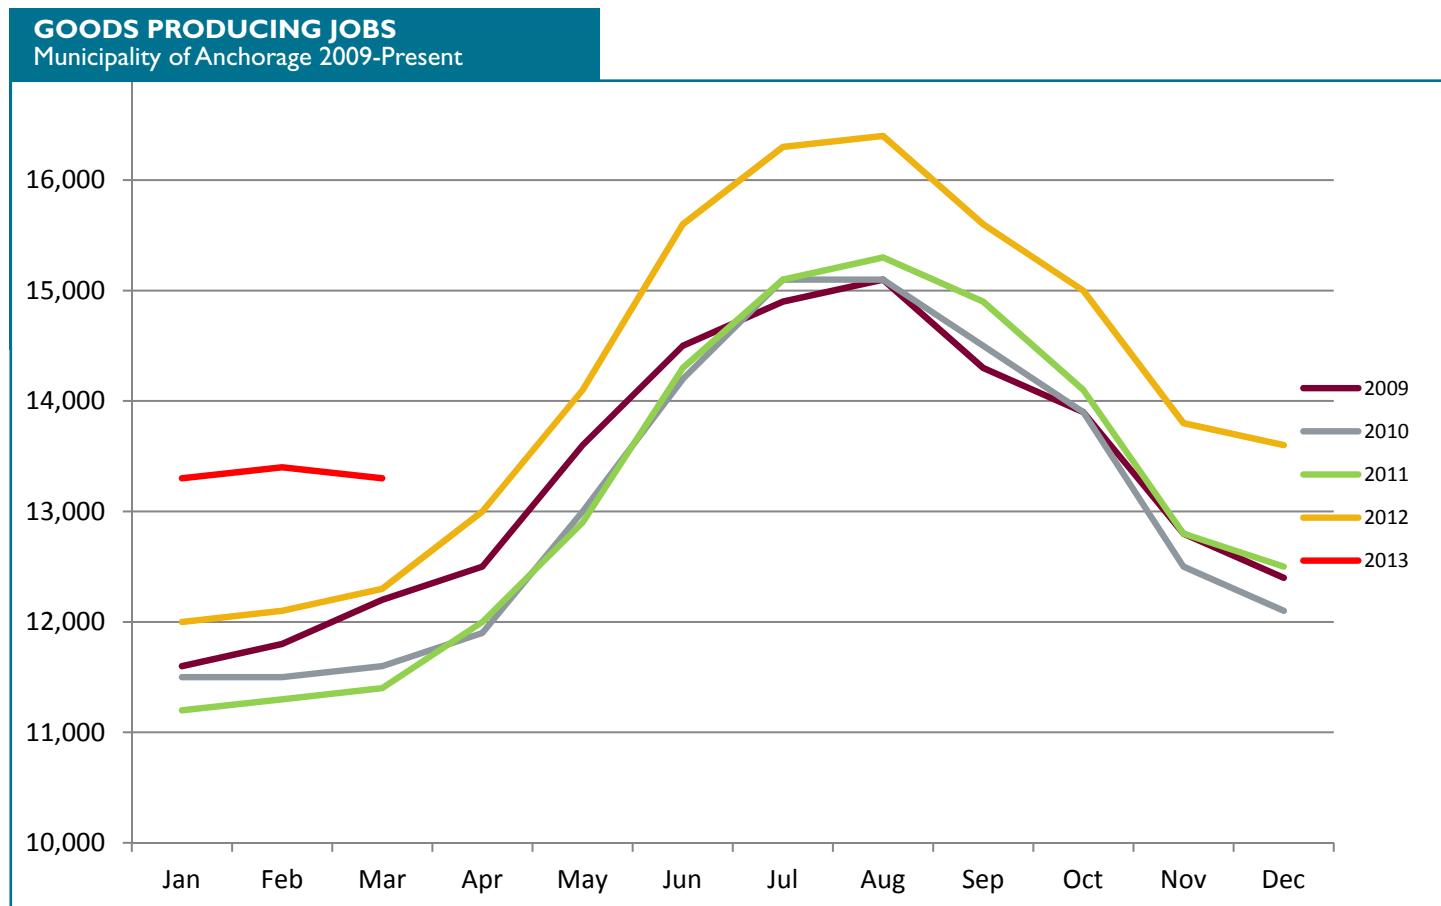

MARCH 12 vs. MARCH 13	Educational & Health Services +600	Professional & Business Services +500
YEAR TO DATE	Leisure & Hospitality +267	Retail flat
	Information & Financial -133	Local & Federal Government -967
		• •

GOODS PRODUCING JOBS

CONSTRUCTION WORK, MINING, OIL & GAS PRODUCTION, MANUFACTURING

Goods producing jobs (those jobs that are specifically tied to production, not those which support the production or maintenance of the production jobs) are showing remarkable growth, **AVERAGING 1,200 MORE JOBS IN 2013 YTD** over the same period in 2012.

The oil & gas sector is leading the way, with 600 more jobs than last year at this point, equalling a growth rate more than 20 percent. With the passing of Senate Bill 21, which improved investment conditions for oil development companies, continued growth in this sector is likely. The construction industry is also seeing higher job numbers than usual in March, averaging 300 more jobs than 2012 YTD. New projects this year include stand-alone stores for the Natural Pantry and Bass Pro Shops. A number of large projects from 2012 will be continued this year. The Associated General Contractors of Alaska is estimating an 8 percent increase in construction spending this year, which bodes well for construction hiring.

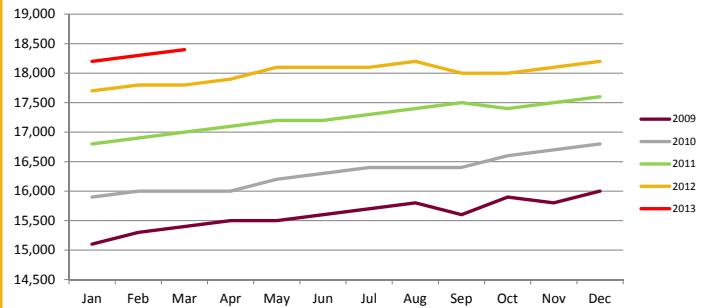

••••••• SERVICES PRODUCING JOBS SUMMARY

HEALTH CARE EMPLOYMENT

The health care industry is still going strong, with **533 MORE JOBS OVER 2012 YTD**. The 3 percent YTD job growth in the local health care sector is still below the 2012 end of year rate. It has improved since February and is still one of the fastest growing service producing industries. If this trend continues through the year, the sector will prove AEDC's January projection of 400 additional health care jobs to be conservative. Health care has been identified by the state Department of Labor as the industry with the highest growth potential in Alaska for the next decade.

HEALTH CARE EMPLOYMENT

Municipality of Anchorage 2009-Present

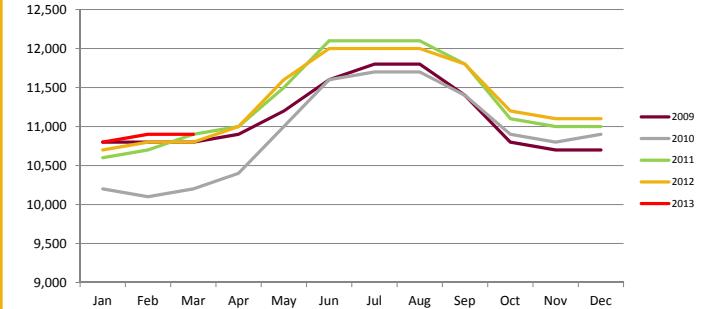

TRANSPORTATION

March's estimate of 10,900 jobs is slightly higher than 2012, and the YTD average is up 100 jobs. AEDC estimates that this industry will retain these 100 jobs through the end of the year. Upcoming air cargo transit data for the first quarter of 2013 will help to show how the industry is faring so far this year.

TRANSPORTATION EMPLOYMENT

Municipality of Anchorage 2009-Present

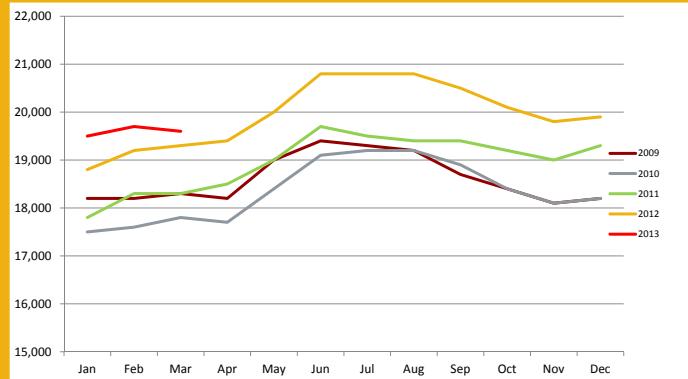

PROFESSIONAL & BUSINESS SERVICES

ENGINEERING, ARCHITECTURE, LEGAL SERVICES, ACCOUNTING, SCIENTIFIC RESEARCH, WASTE MANAGEMENT & ADMINISTRATIVE SERVICES

The YTD average is **up 500 jobs from 2012** and the rate of increase is the largest of all service providing industries at 2.62 percent. Job growth within this industry is often tied to growth in other industries such as oil & gas, construction and transportation. Current conditions look favorable for continued growth.

• • • • • • • • • • • • • • • • UNEMPLOYMENT CLAIMS

Initial unemployment claim applications can be interpreted as a proxy for layoffs. They tend to fall as job growth accelerates.

Continuing claims figures help to show how well unemployed workers are re-entering the workforce. This total does not include workers receiving extended benefits from the federal government. As of the final week of the first quarter, both continuing and initial claims are **lower than this time in the previous four years**, and the overall trend is for the same. These figures tend to decline as the summer approaches and there is a good chance that continuing claims will fall below 10,000 in the third quarter for the first time in five years.

All data referenced in this employment report is from the State of Alaska, Dept. of Labor & Workforce Development website: www.laborstats.alaska.gov

UNEMPLOYMENT ANALYSIS (YTD, 2013)

Anchorage, Mat-Su, Kenai Peninsula Borough

- Nonfarm Wage & Salary excludes self-employed workers, fishers, domestics, and unpaid family workers.

All totals are seasonally non-adjusted totals.

- Government includes employees of public school systems and the University of Alaska.

- Beginning January 2001, wage and salary employment estimates were published under a new classification system. The Standard Industrial Classification system (SIC) has been replaced by the North American Industry Classification System (NAICS). Data prior to 2001 are comparable only at the Total Nonfarm and Government levels.

^{1/} As of January 2001, certain federally-recognized tribal entities were moved to Local Government, which created a series break for Total Government and Local Government. Please see the April 2002 Alaska Economic Trends publication for a detailed explanation.

^{2/} This category was called "Natural Resources and Mining" in previous years. The change is in name only; the industries it includes remain the same.

- Some totals may not equal components due to rounding.

- Source: Alaska Department of Labor and Workforce Development, Research and Analysis Section

* Note: The above numbers are representative of all people employed in the Municipality of Anchorage, this is inclusive of workers who claim residence outside of the Municipality of Anchorage.
(Ex: someone who lives in the Mat-Su, but works in Anchorage would be included in these number)

Press Release

April 19, 2013

COMMISSIONER'S OFFICE

No. 13-21

Unemployment rate at 6.2 percent in March

Alaska's seasonally adjusted unemployment rate was 6.2 percent in March, down three-tenths of a percentage point from February. The comparable U.S. rate for March was 7.6 percent.

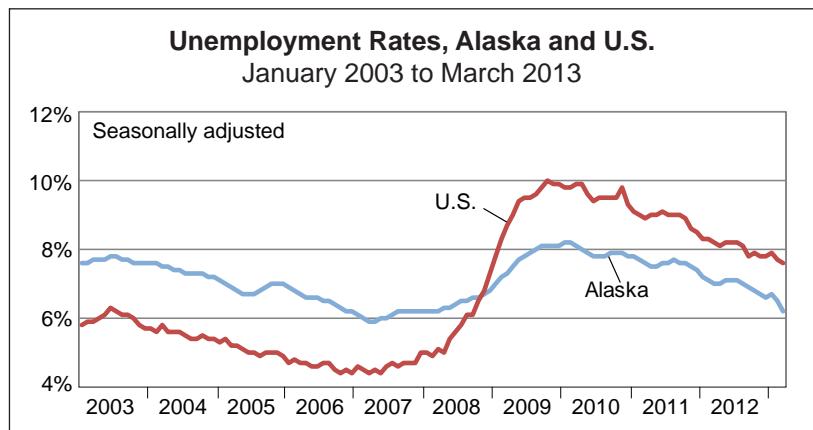

Since peaking at 8.2 percent in early 2010, Alaska's rate has been on a generally downward trend over the last three years.

Alaska's not seasonally adjusted rate was 6.6 percent in March, down from 7.1 percent in February. In a typical year, the state's unadjusted rate will continue to fall until reaching its annual low point in July or August when jobs are most plentiful.

Unadjusted rates fell in all Alaska areas. The highest was 22.5 percent in the Hoonah-Angoon Census Area, and the lowest was 4.6 percent in the Kodiak Island and North Slope boroughs.

P = Preliminary. As more information becomes available, data are revised every month for the previous month and again at the end of every calendar year.

Note: The official definition of unemployment excludes anyone who has not made an active attempt to find work in the four-week period up to and including the week that includes the 12th of the reference month. Many in rural Alaska do not meet the definition because they have not conducted an active job search due to the scarcity of employment opportunities.

¹Unemployment rates that are not seasonally adjusted should not be compared with those that are.
