### **EXECUTIVE SUMMARY**

### MONTHLY UNEMPLOYMENT

The not seasonally adjusted preliminary unemployment rate for Anchorage in March was 6.7 percent, down .03 percent compared to the February revised rate. This is 2.6 percent above the national not seasonally adjusted rate of 4.1 percent and 1.2 percent below the statewide not seasonally adjusted rate of 7.9 percent. The March unemployment rate for Anchorage was 0.9 percent higher than it was in March 2017. As always, it should be noted that these are preliminary survey figures for March and will be revised next month.

March 2018
Unemployment Rate
for Anchorage (preliminary)

### YEAR-TO-DATE UNEMPLOYMENT

The Anchorage 2018 average year-to-date (YTD) not seasonally adjusted unemployment rate rose to 6.5 percent at the end of March, 1.1 percent higher than at this time last year. A decrease of 3,551 in the employment total and a decrease of 2,666 in the Anchorage labor force during the YTD period has resulted in the reported unemployment total increasing by 959. The total number of unemployed people in Anchorage for the month of March is estimated at 9,830 (those actively looking for jobs), 680 more than March 2017.

6.5 % 2018 YTD Unemployment Rate for Anchorage (preliminary)

In the Mat-Su Borough, the March unemployment rate of 9.7 percent is up 0.5 percent from March 2017 while the Kenai Peninsula's unemployment rate of 9.9 percent has increased by 0.8 percent compared to March 2017 (see the charts on pages 9-10 for more details).

It is important to note that the Anchorage unemployment numbers represent the labor force residing in Anchorage, and do not describe the number of filled positions in Anchorage. The industry employment estimates referenced in the remainder of this report are representative of the number of jobs in the Municipality of Anchorage, regardless of the job holder's place of residency.

### ANCHORAGE INDUSTRY EMPLOYMENT ESTIMATES | YEAR-TO-DATE

As for Anchorage industry employment estimates, which includes total jobs in Anchorage held by city residents and commuters, the YTD average through March for 2018 shows a loss of 2,000 jobs (-1.3%) so far compared to the same

148,400

Total jobs in Anchorage March 2018 (preliminary)

period in 2017. The private sector (total jobs minus government jobs) at 119,400 jobs shrunk by 1,300 (-1.1%) jobs during this time, while Government employment at 28,700 jobs has decreased by 700 (-2.4%). Federal jobs decreased by 200 (-2.4%). State government jobs have decreased by 200 (-2.0%) and Local Government jobs have decreased by 300 (-2.8%). Please note that these figures will likely be revised as more data is received and additional analysis is conducted.

The Goods Producing category has seen job losses decline significantly so far this year, losing no jobs so far in 2018. The Mining & Logging industry (which includes Oil & Gas employment) is now flat compared to the same period in 2018. Construction is down 100 jobs (-1.7%) compared to the same period in 2017, while Manufacturing is flat compared to 2017.

Services Providing industries have lost 2,000 jobs YTD (-1.4%). Categories showing increases included Health Care up 900 jobs YTD (+4.4%) and Transportation/Warehouse/Utilities up 400 jobs (+3.8%). Services Providing industries showing losses YTD so far in 2018 include Retail down 600 jobs (-3.5%), Information down 200 jobs (-5.1%), Professional & Business Services down 500 jobs (-2.8%), Leisure & Hospitality (Tourism) down 500 (-3.0%), and Financial Services are currently down 200 jobs (-2.7%).

### **ANCHORAGE EMPLOYMENT** Municipality of Anchorage 2014-Present 164,000 162,000 160,000 158,000 156,000 154,000 152,000 150,000 148.000 146,000 144,000 May Sep Aug Oct

month. Manufacturing was up 100 jobs (+5.6%) at 1,800 jobs.

### **GOODS PRODUCING JOBS**

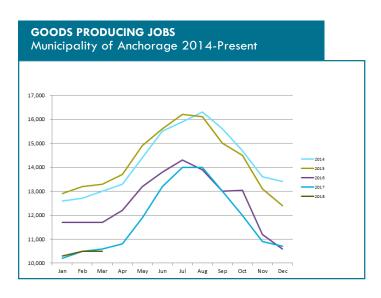

# CONSTRUCTION WORK, MINING, OIL & GAS PRODUCTION, MANUFACTURING

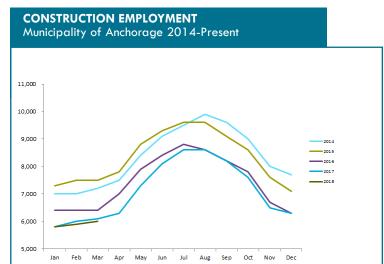

Please note that the rest of the job numbers are comparing March 2018 to March 2017 and are not YTD aggregate numbers like the previous section unless noted. This is to more accurately show Anchorage's job market as it currently stands.

Monthly losses in the number of Goods Producing jobs in Anchorage are no longer contributing to the overall job losses in 2018 YTD. The March total of 10,600 for Goods Producing jobs is -100 (-1.0%) fewer jobs than in March 2017. Jobs in the Mining & Logging industry, which includes Oil & Gas employment, were flat for the

The Anchorage Oil & Gas sector March job total of 2,600 was flat compared to March 2017, clearly indicating year over year losses have stopped. Statewide, oil & gas industry March employment stood at 9,400 and is down 600 jobs (-6.0%) compared to March 2017. While Alaska continues to see job losses overall, the recent oil market recoveries in the low to mid \$70 per barrel range in both domestic and international oil prices are a positive sign for industry job growth in the future if recent price trends can be sustained. However, the failure of the State of Alaska to finalize tax and fiscal policy continues to be the greatest barrier to new oil industry investment and the jobs that would accompany new investment.

March Construction employment is flat at 6,000 jobs. Anchorage building permit application values, a measure of interest in construction, have slowed during the first 4 months of 2018, totaling \$127.8 million through the April 28, 2018 reporting period, -25.5% lower than the \$171.5 million at this point last year. Projects submitted for permits are a general mix of private sector and government projects.

### **SERVICES PROVIDING JOBS**

ENGINEERING, RETAIL, TOURISM, HEALTH CARE, ETC.

Losses in the number of Services Providing jobs in Anchorage continue to lead the overall downward job trend 2018 YTD. There is a marked slowing of total losses in March, though still pronounced in several industry sectors within this broad category of jobs. For March 2018 total services providing jobs stood at 137,900, down 1,400 (-1.0%) for the month compared to the same month in 2018. The outlook for the remainder of 2018 is for job losses in this category to continue to lead total job losses in Anchorage for the year.

The ongoing delayed ripple effect caused by the losses previously seen in the Goods Producing category in high wage sectors like oil and gas and construction in the previous year continue to negatively impact the Services sector. Lower levels of consumer spending that resulted from those earlier job losses are now being felt in sectors like retail, accommodations and the food services sectors.

### HEALTH CARE EMPLOYMENT

Employment in the Health Care sector shows continued growth, with 800 (+3.7%) more jobs in March 2018 over March 2017. As noted in AEDC's 2018 Economic Forecast report, this sector is tracking within our projection and will continue to be one of the bright points in another down year for overall job growth.

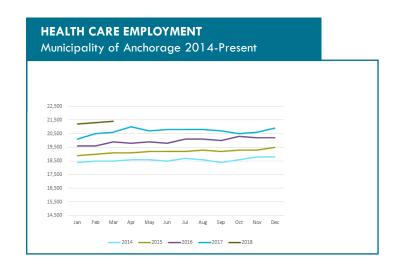

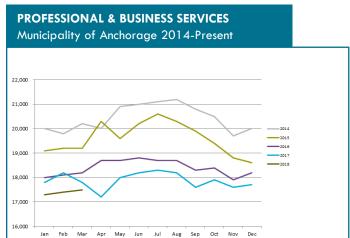

### TRANSPORTATION, TRADE & UTILITIES

The March employment in these sectors are down 300 (-1.9%) jobs this year. The Retail Trade sector, a subset of the TTU industry, is down 600 (-3.6%) jobs in March and these losses is mostly attributable to the closing of 2 Sam's Clubs and Sears, while wholesale trade was down 100 jobs (-2.2%).

On a more positive note, March job estimates in the Transportation/Warehouse/Utilities sector (a sub-group of the Trade/Transportation/Utilities industry) remain up at 300 jobs (+2.8%). The continuing strength in the air cargo industry at Ted Stevens International Airport, combined with a strong visitor season outlook in 2018 and its effect on passenger counts, underscores that this sector will continue to be a steady component of the Anchorage economy.

### PROFESSIONAL & BUSINESS SERVICES

This category includes consulting, engineering, architecture, legal services, accounting, scientific research, waste management & administrative services.

Professional and business services dropped 300 (-2.8%) jobs in March compared to the same month in 2017. While losses in this sector remain pronounced, the sector is seeing a pronounced declining trend of job losses the last 9 months. It is likely the rate of job losses in this sector will bottom out in the coming months of 2018.

### GOVERNMENT

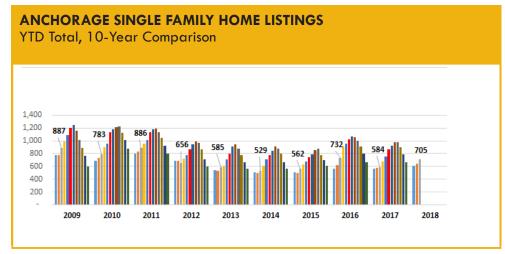

Government jobs for March in Anchorage are down by 500 jobs (-1.7%) compared to March 2017 due to losses in the local Government sector down 200 jobs (-2.8%) while State Government positions have also decreased by 200 (-2.0%). Federal Government jobs are down 200 (-2.4%).

# **ANCHORAGE HOUSING**

Source: Anchorage MLS

# SINGLE FAMILY HOME LISTINGS

March data from Anchorage Multiple Listing Service shows that inventories of homes for sale, at 705 in Anchorage, were up 20.7 percent compared to March 2017, the fifth-highest inventory level for this month in the last 10 years. The Anchorage housing market inventory remains a relatively balanced market of buying and selling opportunities for home sellers and home buyers.

# SINGLE FAMILY HOME MONTHLY UNIT SALES

Anchorage monthly sales of single family homes in March were the fifth best for the month in the last 10 years. One hundred ninety units were sold, a 4.5 percent decrease compared to March 2017.

# ANCHORAGE SINGLE FAMILY HOME MONTHLY UNIT SALES YTD, 10-Year Comparison as of 3/31/18 400 250 250 176 100 50 2009 2010 2011 2012 2013 2014 2015 2016 2017 2018

Source: Anchorage MLS

### **ANCHORAGE SINGLE FAMILY TOTAL UNIT SALES** YTD Total, 10-Year Comparison as of 3/31/2018 Source: Anchorage MLS

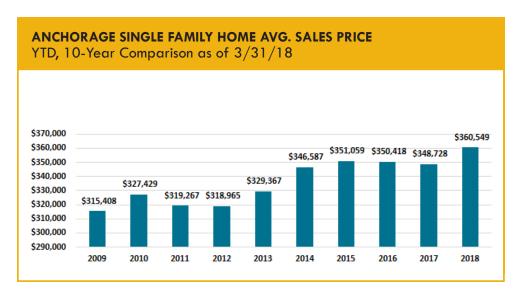

# SINGLE FAMILY HOME YTD TOTAL UNIT SALES

YTD sales for the first 3 months of 2018 are modestly below the same period in 2017 with 468 units sold so far in 2018, down 9.8% compared to the same period last year. 2018 sales are tracking as the sixth-best year for total sales in the last decade.

# SINGLE FAMILY HOME AVERAGE SALES PRICE

The average price for a home sold in Anchorage YTD through the end of March stood at \$360,549, up \$12,121 compared to the same period in 2017. While average sales prices can vary widely from month to month, the annual average is another good measure of market health. At 3.5% percent higher than at this point last year, this average price is highest for the 10-year average for this three-month period.

Source: Anchorage MLS

### ALASKA FORECLOSURES

Alaska continues to show solid indicators in this category. Out of the 50 states and District of Columbia, Alaska remains near the lowest at 0.4 percent of all active mortgages in foreclosure for the 12 months ending January 2017. The national average was 0.6 percent. Another positive indicator is Alaska's serious delinquency rate, at 1.1 percent of all mortgages statewide, well below the national average of 1.6 percent. Current foreclosure and serious delinquency data shows that the Alaska housing market remains solidly healthy as of this report.

### **ANNUAL BANKRUPTCY FILINGS** As of 3/31/18 1,000 800 600 400 200 15 2010 2011 2012 2013 2014 2015 2016 2017 2018

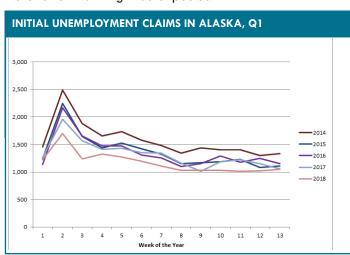

Source: American Bankruptcy Institute

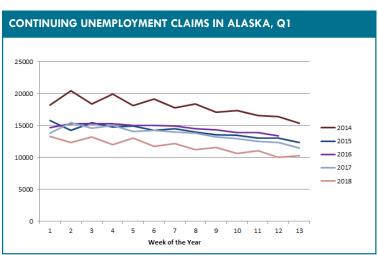

### **ALASKA BANKRUPTCIES**

According to recently released data from the American Bankruptcy Institute, Alaska bankruptcies remain at near record lows. For the 3 months ending March 31, Alaska ranked 51 out of the 50 states and District of Columbia with a per capita rate of 0.56 bankruptcies per 1,000 Alaskans. This compares to the national per capita rate of 2.42 bankruptcies per 1,000 Americans. The total number of bankruptcies in Alaska YTD, at 100, are down by 16 percent compared to the same timeframe in 2017. As measured by this metric, the overall financial health of Alaska's citizens and businesses continues to demonstrate results that are much better than might be expected.

### UNEMPLOYMENT CLAIMS

Initial unemployment claim applications can be interpreted as a proxy for layoffs. They tend to fall as job growth accelerates. The trend in weekly totals in 2018 continue to track at record lows below 2016 and 2017 levels, well under recent highs seen in 2011. This continuing low range for initial unemployment claims are likely a result of mitigating factors such as older workers retiring in the face of the recession, job losses impacting non-resident workers and, the most likely cause can be attributed to laid off workers leaving Alaska for better job opportunities in the Lower 48 states. In all cases, these are workers not applying for unemployment benefits in Anchorage or Alaska, thereby keeping the unemployment rate lower than might be expected.

Continuing claims figures help to show how well unemployed workers are re-entering the workforce. This total does not include workers receiving extended benefits from the federal government. 2018 weekly numbers in this category continue to track at record lows below 2017 for the same timeframe. This is another indicator of a level of strength still to be found in the Alaska economy. Declining job availability in the future may negatively affect the ability to find jobs for those workers included in this metric. Current trends do not support the likelihood of this trend developing. However, if this trend should develop it will result in an increase in the numbers of workers receiving unemployment benefits in the long term, though how significant that increase might be is highly speculative.

The Current Employment Statistics (ES) survey, is based on a survey of approximately 145,000 businesses and government agencies representing approximately 623,000 worksites throughout the United States. The primary statistics derived from the survey are monthly estimates of employment, hours, and earnings for the Nation, States, and major metropolitan areas. Estimates for the current year may be subject to large revisions that will be published early in the following year. CES data in the current year is presented as compared to CES data from the same months in the previous year.

The Quarterly Census of Employment and Wages (QCEW) program publishes a quarterly count of employment and wages reported by employers covering 98 percent of U.S. jobs, available at the county, MSA, state and national levels by industry. This data is considered to be the more definitive analysis of employment figures and trends. QCEW data in the current year is presented as compared to QCEW data from the same months in the

# **Employment Down 0.8 Percent, Unemployment Rate Unchanged**

JUNEAU, Alaska—Alaska's total employment was down an estimated 0.8 percent in March from March 2017, a loss of about 2,600 jobs.

As a percentage, oil and gas employment's decline of 6.0 percent was the largest (-600 jobs). Retail was down 2.0 percent (-700 jobs). Construction's loss of 0.8 percent (-100 jobs) was smaller than in recent months. Employment fell in all three sectors of government: federal by 0.7 percent, state by 0.8 percent and local by 1.2 percent. Local government's declines were in public education. Health care continued to be the outlier, adding 1,000 jobs since March 2017 for a 2.7 percent increase.

Alaska's seasonally adjusted unemployment rate remained at 7.3 percent in March. The comparable national rate was 4.1 percent.

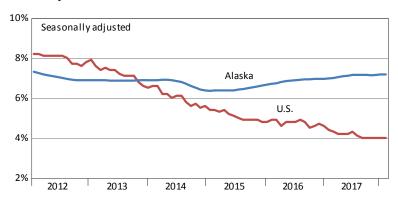

Alaska's not-seasonally adjusted rate dropped to 7.9 percent, down three-tenths of a percentage point from February. Unemployment rates fell in all but three of 29 boroughs and census areas, increasing slightly in Petersburg and Kusilvak and holding steady in Aleutians West. The lowest rates were in the Aleutians East Borough (1.8 percent) and the Aleutians West Census Area (2.5 percent), as is typical for areas with winter fisheries.

Rates were over 20 percent in rural areas with limited year-round employment including Kusilvak (22.6 percent), Hoonah-Angoon (20.5 percent) and the Yukon-Koyukuk Census Area (20.1 percent). Skagway, which depends on summer tourism, also has consistently high rates in the offseason (21.1 percent).
