

Real-Time Jobs Intelligence Report Q1 2023

Sponsored by

Produced by

Introduction

The data from the Real-Time Jobs Intelligence Report comes from Jobs EQ, a service that provides access to labor market data down to the zip code. This report is a snapshot of the Anchorage job market in the first quarter of 2023.

In this report, readers will find information on the types of jobs, education levels, certificates and hard and soft skills that are most sought-after in Anchorage.

This information helps to inform important business decisions, from tech schools using hard data to determine which certification programs are most crucial, businesses using ad duration periods to identify which jobs are easiest to fill, to prospective employees deciding top certificates in which to invest their time and resources.

The appendices supplement this at-a-glance report by extending the top 10 lists to the top 50 and including an estimate of median wages.

This report and all data herein were produced by JobsEQ®, a product of Chmura Economics & Analytics. The information contained herein was obtained from sources we believe to be reliable. However, we cannot guarantee its accuracy and completeness.

Total Online Job Postings

(Total reflects postings active between 1/1/23 and 3/31/23)

28,685

Representing:

16,674 Job Titles

4,574 Employers

1. Nursing
2. Business
3. Computer science
4. Accounting
5. Business administration
6. Engineering
7. Finance
8. Psychology
9. Social work
10. Marketing

Data Notes

Job ads data are online job posts from the Real-Time Intelligence (RTI) data set, produced by Chmura and gleaned from over 40,000 websites.

Data are updated daily and are subject to revision. Data from the last three days typically have reduced volume while incoming data are processed. Since many extraneous factors can affect volume of online job postings, time-series data can be volatile and should be used with caution.

All ad counts represent deduplicated figures. It is not always possible to conclusively identify duplicate ads with the information provided. Characteristics that impact this determination are the wording of the ads, volume of information provided, the timing of the ads, and the sites where the ads appear. Roughly two-thirds or more of ad volume is removed through this process.

Data reflect ads meeting user query specifications and include any Zip Code Tabulation Area (ZCTA) in or intersecting with the region(s) being queried.

RTI wages are extracted from job postings as given and are analyzed and converted into hourly or annual formats. When wages provided are hourly, the conversion to annual wages assumes full-time, year-long employment. When a wage is given as a range, a single wage is selected within that range based upon our analysis of the “most likely” wage given those circumstances. Displayed wages in RTI may not include commissions or overtime, depending upon how the source ads present those wages. After all analysis and cleaning, roughly 12% of all job postings provide a usable wage.

Approximately 4% of jobs are omitted from the RTI duration data due to quality reasons. For example, ads open for an inordinately long period—indicating that it is likely being left up not for one, but for multiple openings—are excluded from the duration data. These ads are also excluded from the count of “Ads Closed”.

An “active” ad refers to an online job posting that was still posted online when Chmura’s web crawler last viewed that page, which typically occurs daily or every day and a half. An ad is considered “closed” if Chmura’s web crawler no longer sees the ad listed or if the ad is specifically designated on the site as no longer being active.

We make every attempt to catch all of the significant job-posting websites across the United States, but we cannot guarantee complete, 100% coverage. If you have any questions about a particular website, please do not hesitate to ask.

Appendix A: Postings by occupation

SOC	Occupation	Median Wage	Median Wage "n"	Active Job Ads
29-1141.00	Registered Nurses	\$90,321	105	1,691
